G-FORCE GROUPS

G-Force Security Pvt. Ltd.

G-Force Technical Training Institute (P) Ltd.

G-Force Research & Services Pvt. Ltd

The objective behind publishing this profile is to introduce our company G FORCE Group, our unique qualities and what we offer. We have expanded our operation to provide wider participation of support services in the form of Security Services, Recruitment Agency, Training Institute, Cleaning Repair and Maintenance Service.

G-Force essentially believes in transparency, discipline, honesty and professionalism. Based on these values G-Force is standing firmly in its foundations and leading its way. The word G-Force is derived from Gorkha Force which is renowned in the world for its bravery, integrity and honesty. G-Force believing truly in these factors, have built its foundation on the same values. In fact, these are the things which are embedded deeply into our behavior and working culture. G-Force has developed and groomed itself to redefine the outlook which portrays Gorkhas not just as fighters but also as skilled technicians, doctors, engineers and other working professionals in various fields. In business, people are the greatest asset, so our group is dedicated to share our knowledge, our expertise and our resources so that everyone understands what is important now in the world of work and knows how best to respond. We care about people and the role of work in their lives. We respect people as individuals, trusting them, supporting them, enabling them to achieve their aims in work and in life. We help people develop their careers through planning, work, coaching and training.

The group has operations in Nepal and Qatar proving its competence in providing reliable services to its clients in the National & International market. Over the years it has earned high reputations and credibility and is constantly moving ahead to ensure reliable quality assurance in its services in order to expand its services.

Lt.Col (Retd.) Jayendra Bir Singh Basnyat

EXECUTIVE CHAIRMAN

G-FORCE GROUP

Introduction

G-Force is a Nepal based professional Security Company which was established in the year September' 2006 and at present is a leading Security Company in the country. The Company is ISO 9001:2008 certified and is a registered Private Security Company, fully licensed and in compliance with all the laws and regulations of Nepal.

G-Force is managed by a team of experienced retired Professionals from army, police and civil background, who are totally dedicated in providing effective and efficient Security services.

The Company offers comprehensive range of security related services and is fully dedicated to help in providing protection to your agencies and organization in different fields and locations from damage ,loss, theft, violent attacks, riots, mobs, fire hazards, etc in a timely professional manner. The company's unique standing in the security and safety business does not just result from its size or scale of operation's, it is in fact a reflection of the high quality and professional approach of the company to the services provided to all its customers.

Branch Office Network

Several Branch Offices have been established throughout the country in order to facilitate the Company's customers and to the company's own staffs as well. The Company at present has its Branch Offices located at Pokhara, Nepalgunj, Biratnagar, Simara & Dhangadi which are all headed by ex-Army Officers as Branch Managers. Area Representatives have also been appointed for Dolpa, Humla, Jumla & Mugu. G-Force has recently appointed hetauda branch office as regional office.

Management Team

Lt.Col (Retd.) JayendraBir Singh Basnyat

Executive Chairman of G-Force Group

Lt. Col (Retd). Jayendra Bir Singh Basnyat graduated from the military academy in Nepal. He was commissioned as a 2nd lieutenant rising to the rank of Lt. Col prior to retirement. Guarding Services

Being a professional Security Organization G-Force offers a wide range of services and equipment for all kinds of premises and operations. As the Company is fully committed to a quality service, G-Force provides smartly uniformed, highly trained and well supervised guards for security and safety of assets, personnel's and property. Guarding services are carried out by way of providing guards for static posts and mobile patrols for all types of premises. We believe that the success of our Guarding Division can be attributed to the way in which we approach this business. The Guards are fairly selected through Company's policy and they are thoroughly vetted and properly trained. G-Force guards are smartly uniformed and are well equipped.

The Company firmly believes that the three main criteria in providing quality guarding services are;

Selection

Utmost attention is given to the recruitment of our personals in accordance to the stringent parameters laid down as per the Company's policy. This includes education, age, previous background, physical mental fitness. Both male and female candidates are provided equal opportunities as well as those from the ethnic origins.

G-Force Technical Training Institute

“center of excellence for skill development”

G-Force Technical Training Institute (GFTTI) is a Nepal based technical and vocational training institute established in 2012 with the mission to promote technical training and create employment opportunities. It is accredited with ISO 9001:2008 and complies with the norms and standards of the total quality management. GFTTI is a sister organization of G-force Security Pvt. Ltd which is a reputed and well known security company in the country which has notable clients ranging from a number of commercial banks, financial institution, hospitals, education facilities, infrastructures (towers) and more.

As a technical training institute GFTTI is primarily focused on delivering quality training and linking its trainees with placement procedures and finally employing them. It has developed high ethics and training standards. The training curriculum is as per the standards of Council for Vocational and Technical Training (CTEVT) and the institute is in the process for affiliation with CTEVT.

The Training center is located in a peaceful and enabling environment, which stimulates the training activities. GFTTI has developed infrastructures which is equipped with the latest in the trend technologies envisaging the training needs. The trainers are highly qualified and are ToT certified trainers. Trade in line trainers imparts quality to the training and their delivery which further strengthens the potential candidates to align them to their working situations. To further professionalize them On the job training (OJT) is added as the part of curriculum.

G-Force Believes that quality of security guards is determined by the quality of their training. Training is mandatory for ex-security personnel from armed security force, but for civilians striving to be security guard it is mandatory to take training. Therefore, to ensure quality training and refresher training as well as other vocational trainings, G-Force has introduced its sister organization as G-Force Technical Training Institute (GFTTI) in short. It essentially believes in transparency, professionalism and quality in training. Before deployment, it is mandatory for all G-

Force employees to undertake a Basic Security Training Course covering the various aspects of security services which they will be performing during their service tenure. The training process is ongoing and progressive throughout the employee's career to refresh and further develop their

professionalism. G-Force Security is conducting Basic Security Training, besides providing security services to individuals, banking sectors, hospitals, telecoms, educational facility, industrial sector and other many other institutions. Security Guard Training is basically categorized in different sections:

The course of training involves classroom lectures, role play exercises and assignment specific training. In addition to lessons on basic guarding skills, they are taught the rudiments of First Aid and Fire Fighting.

Besides, security other vocational and technical training are also imparted from training school, viz.

electrician,	housekeeping	motorcycle mechanic
welding,	ac duct fitting	civil foreman
scaffolding,	mechanical fabricator	
plumbing,	off season vegetable, etc.	

GFTTI has developed infrastructures on its own land which comprises of about 5 Ropani's of land located at Goldhunga-1, Lolang which is a ten minutes ride from Balaju By-Pass. The training center is located in a peaceful and enabling environment which is free from pollution of Kathmandu.

- Own building complex with ample training area
- Training hall and labs, training facility with well equipped materials
- Training enabling environment and stimulating areas.

Key features of training center

- Located at peaceful and enabling friendly environment.
- Comprises of fully furnished training rooms, well equipped workshop labs,.
- Safe and clean drinking water is provided which is filtered through natural biosand filters installed by SMART PANI which ensures high quality and pathogene free drinking water tested by Nepal Environmental & Scientific Services (NESS).
- Clean and hygienic canteen facilities.
- 24- hour perimeter security with round the clock CCTV monitoring and perimeter security devices.
- Gender friendly environment and inclusiveness.
- A focal training coordinator room to design courses, conduct meetings, training monitoring and evaluation.
- Fire fighting equipments and fire safety team.
- Central Monitoring room to monitor all the CCTV activities and other devices.
- Elementary First Aid room with CPR system, pressure guage, and first aid kits.

Training Approach and Modules

GFTTI believes on transparency and quality. To ensure both transparency and quality GFTTI has formed a committed team of professionals to shortlist, screen, interview, counsell, monitor and evaluate the whole training process. In addition to it GFTTI has a placement cell which guides and gives counselling regarding the employment process.

GFTTI training module is based on the training- learning approaches, which is delivered by ToT certified trainers.

Media, training videos, computer aids and applications are used to further impart the training program.

Demonstration and practical application is the backbone of training process in GFTTI.

Stress Management and Meditation are incorporated as a part of training curriculum which is mainly imparted to trainees going for overseas employment.

Overseas Orientation is also imparted to the trainees going for overseas employment.

Security Training Syllabus

- Introduction about the Company & Security Service
- Role of Guarding and Introduction to policies and Security procedures
- Basic English Language
- Patrolling and Observation techniques
- Health and Safety, basic first aid
- Code of Conduct
- Dealing with People & Clients
- Legal Obligations
- Electronic Security System (Introduction on various security electronic devices and its operation)
- Fire Prevention and control. Types of fire extinguishers, their use and action to be taken during fire break out.
- Action in the event of Bomb threat
- Role-play Exercises
- Radio Communication & Telephone procedure
- Emergency Procedure
- Use of Access Control & Personal Equipment.
- Basic Computer operating skills with Email and Internet.
- Report Writing, Preparation of Incident Reports and daily logs.

- Gate House and Reception Duties. Procedure for control of visitors, materials, Key control and gate passes.
- Search & Detection Procedures personnel and vehicles. Types/method of search, use of detection equipment.
- Morale & Motivation
- Disaster Training on man-made and natural disaster.

In addition to Basic Training, Refresher Trainings are also conducted on a regular basis to ensure the Security Guards understand his or her role of responsibilities wherever deployed. This not only helps in refreshing the skills taught prior to deployment but also helps in implementing the skills in the workplace.

The training complex is also installed with modern electronic security devices viz. CCTV's, fire/burglar alarm system, motion sensors, Central Monitoring Stations (CMS) which are monitored by the control room which gives the trainees an insight about the functioning of the various electronic devices related to security systems.

Moreover GFTTI not only provide training on security but to a multitude of different vocational and technical trainings which inevitably impart socio-economic support to underemployed and unemployed youths aiding to the overall economic development of the country.

Supervision

It was realized that no one can work in a vacuum and without close management input give a lot of importance to in depth on activity and the ground supervision. A strong operations team comprising of Managers, Inspectors and Patrols Supervisors carry out checks to all assignments and guards on a 24X7 hrs basis. This is further supported by Operations Control Room which is equipped by all sophisticated and latest communication system and the Operations room is managed by fluent English speaking personnel so that both client and guards can communicate and understand each other to assist in any situations.

Management and Performance Review Meetings

As a standard practice of the Company, we hold regular meetings with our customers at all levels to discuss on reports, problems and any queries on the security arrangements. These meetings also help us in indentifying problematic areas which might build up into a threat or risk at a later stage. The management team is also present in these meetings periodically.

We have found these meetings fruitful for the clients who take security as a priority and today we are providing our services to some of the most prestigious organizations in the country.

Our successful start in Nepal proves that G-Force is not only quality driven but also has the resources to back up any kind of security and disaster operations in a professional manner.

Reporting

G-Force firmly believe that in order to pre-empt an incident it is extremely important that proper reports are generated right at the grass root level on a daily basis which are submitted to the operations and the clients on a regular basis. The reports are also compiled on a weekly and monthly basis on standard Company's reporting formats for providing effective security at the same time to monitor the performance of our guards.

Center Monitoring Station (CMS)

G-Force Security Central Monitoring Station

We have introduced a technology in the security surveillance system by which the clients feel more secured and confidence by this system

What it DOES? We will survey your premises and install the sensors, control units as per requirement. Once the sensors detect any unusual movement, it will trigger the control panel installed at your premises which resends the information to our H.Q. control room.

What NEXT? Once we get such information, our security experts at control immediately take the following actions:

- Inform the Tel. Nos. that you have assigned to us.
- Inform the nearest Police Station.
- Nearest G-Force mobile backup (QRT) reaches your premises as early as possible depending upon the traffic condition.
- CMS fee applies.

Quick Reaction Team (QRT)

G-Force has its own unit of Quick Reaction Team (QRT), led by Ex-Army personals. In any kind of “ALARM SIGNAL” received at our CMS, QRT reaches your premises equipped with non-fatal arms to help protect your asset. QRT is functional 24x7 Hrs and is regularly carrying out patrol duties to check the performance of the security guards deputed in various assignments.

Key Features of QRT:

- Prompt and quick response to any kind of situations
- Well Equipped with communications set, Flashlights, non fatal light arms, stun guns, batons etc.
- Round the clock central monitoring stations with alarm trigger response system.

G-Force Research And Services

G-Force has been providing clients with various electronic devices and other equipments that include CCTV monitoring, CCTV, CMS, intrusion alarms and other sensors etc. It has been providing by G-Force Research and Services. Apart from providing electronic devices, it has also been providing various cleaning and facilities services, maintenance services. It has been providing competent and professional service personnel in the basis of market needs.

Electronic and Sensor Based Devices

Smart Intelligent Panel (SIP)

Smart intelligent panels are the latest state of the art device that integrates the power of computer, scanner, media, projector, internet, various program and features into a conference television. It lets user conference over internet and eliminates the use of projectors. It converts the conference room into a multi tasking arena where the user can generate and share ideas with a

single device which is similar to led TV with touch screen functions with zoom, pan, edit and other multiple functions. It is useful for engineers, designers, architects, urban planners, doctors, military, police, diplomatic missions and the list continues.

Biometric Scanners

The Biometric scanners are the ultimate security information and data storage system that allows organizations to collect biological identities such as finger print, retina and other such unique individual identity and allow secure access or use it as data and information. Currently it has been providing latest biometric scanner (fingerprint) services to various financial institutions, education and health sectors.

Advanced surveillance optical Systems

It is the latest technological advancement in optical systems. The system incorporates High definition cameras which have zoom, pan functions along with thermal imaging , nightvision modes, x ray modes etc. which are also capable of penetrating fog and give a distinct edge in security surveillance.

Advanced Perimeter Security System

Perimeter security system along with integrated systems, anti climb, electrical fencing systems with trip sensor technologies, are among the latest in perimeter security that are all state of the art systems.

Intrusion Alarm monitoring and control Systems

Intrusion alarm, fire alarm, motion sensors, burglar alarm, burglar face detection are some of the devices that falls in this category. It used latest sensor technology to carry out the desired operation.

Central Monitoring Systems

A centrally placed monitoring station that allows user to track all its equipments and sensor through a single window and control its functions. It gives user the competitive edge in secure environment. It also incorporates fuzzy logic trip monitoring stations and automatic information and data retrieval systems.

Advanced Microwave Sensors and infrared sensors

Microwave and infrared, not detectable to normal human preceptors are used as sensors to secure areas. Its ultra high frequency waves detect even slightest of the disturbance and change in motion. They are state of the art devices technically capable of detecting slightest of the vibration or movements.
